The JAFCO Social Skills Improv Program provides workshops that teach social skills to children with developmental disabilities through exercises, games and role plays based in improvisational theater. Children will learn while laughing, having fun and making new friends!

Research has demonstrated that improv promotes:

- Active listening
- Effective verbal and non-verbal communication
- Using imagination
- Collaborating with others
- Effectively expressing and interpreting emotions

This program is offered at no cost!
To schedule a workshop, contact Rebecca Salus, Program Director
